Forecast For West Midlands
Issued by Met Office Exeter
at 0400 on Wednesday 22 Sep 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy to start, but soon becoming warmer and brighter.

Today:
A cloudy start in the northwest, with mist or fog in places; these soon clear through the morning, and cloud breaks, to leave a fine and dry day for all with plenty of sunny spells, feeling warm in these. Maximum temperature 21 deg C (70 deg F).

Tonight:
Clear spells and late sunshine continue into the evening, before skies turn cloudier from the north overnight. Dry for most, but with some patchy rain possible in the west. Minimum temperature 11 deg C (52 deg F).

Thursday:
Staying cloudy but dry through the morning, before cloud breaks into the afternoon allowing for brighter, and sunny spells to develop. Breezy throughout. Maximum temperature 22 deg C (72 deg F).

Outlook for Friday to Sunday:
Quite cloudy but largely dry on Friday and Saturday, with winds easing through Friday. Sunny spells and showers Sunday, heavy and possibly thundery in the south. Feeling quite warm throughout.
